## THE FIRST NATIONS NATURAL RESOURCES YOUTH EMPLOYMENT PROGRAM

LOOKING FOR A  
FUN AND CHALLENGING  
SUMMER JOB OUTDOORS  
WHILE EARNING HIGH  
SCHOOL CO-OP CREDITS?  
APPLY TODAY TO BECOME  
AN OUTLAND RANGER!

# PROGRAM OVERVIEW

The First Nations Natural Resources Youth Employment Program has been successfully operating since 2000 employing over 390 youth. This multi-year program offers a variety of natural resources based field work opportunities and hands-on learning experiences. Youth spend their six weeks of employment living in a remote camp setting in Northern Ontario alongside the full time camp management team and on-site teachers. During the program youth have the opportunity to gain two senior level high school coop credits and spend a week living at a local College or University.

## WHAT TO EXPECT:

During the program youth will work a standard work week. Days are typically 8:30 to 4:30 and most days are spent working and learning outdoors.

The first weeks are composed primarily of training and learning modules in preparation for the demands of field work.

During days off, youth will travel to a nearby town or city to stock up on supplies, explore and visit family. The program offers various extra curricular activities to keep youth active and engaged during free time including: drum making, bow making, flint napping, volleyball, basketball, canoeing, swimming, yoga, running, movies nights and much more! Internet and cell service are available onsite but may be limited based on location.

Management supervision and access to onsite teachers is available 24/7. A professional on-site cook prepares all meals and snacks with a focus on healthy eating.

Camps are co-ed but have separate sleeping quarters and range from 24 to 30 youth per site.

Outland offers competitive wages with a daily performance bonus. Youth are paid for work days
