### NOTICE TO MEMBERSHIP

#### Collared Wolves

Please be advised that there are wolves with GPS monitoring collars on in the Whitesand Area. This is a part of a Caribou research project by Gesner and Associates that will be ongoing until February 2027.

Please advise children that they may see wolves wearing collars and that they are not dogs. If you see a wolf wearing a GPS collar, use normal precautions as you would regarding wolves and **do not approach**.

If you have any questions about the research project please reach out to the Whitesand Environmental Project Manager.

Thank you.
